## UNDERSTAND THE CONCEPTS...

Before starting exercises, explain - *in your own words* – the benefit of some concepts in JS

What is the benefit of	You explanation
Benefit of function <b>default argument</b>	<i>It avoids error when no value is passed and makes functions more flexible.</i>
Benefit of <b>arrow functions</b>	<i>They are shorter and keep the context of “this” from the surrounding code.</i>
Benefit of the <b>destructuring syntax</b>	<i>It makes code cleaner and easier to extract values from objects or arrays.</i>
Benefit of the spread operator	<i>It helps clone or merge arrays and objects without changing the original.</i>
